Dear Valued Customer:

Re: Change in Traffic Patterns – Hilo Harbor

Young Brothers will be transitioning in phases from its current docking facility at Pier 2 to its new facility at Pier 4 during the month of December. The new Hilo Pier 4 has been under construction over the past several years and is part of the Harbor Modernization Master Plan to improve throughput of cargo flow. Over the course of the coming weeks, Young Brothers will be providing notices and handouts showing new traffic patterns and cargo layout at the pier. In addition, there will be changes to the delivery and pickup schedule for the port of Hilo for all cargo.

As we transition to the new Pier 4 facility, safety will be the utmost priority for all Young Brothers facility users. Additional security personnel will be stationed throughout the pier to direct traffic flow and we ask your cooperation in adhering to their instructions and directives.

We apologize for the inconvenience and appreciate your patience.

Sincerely,

/s/ Dean A. Kapoi
