Important Message about Driver Safety at Young Brothers Port Facilities

Dear Valued Customer:

Young Brothers is committed to providing a safe working environment for its employees and all visitors. To that end, we remind all drivers and visitors of the following basic safety rules:

1. **Young Brothers forklifts and top pick equipment have the Right-of-Way at all times.**
2. **Truckers/Drivers must NEVER approach operating Young Brothers forklifts and top pick equipment. Do not pass under suspended loads or behind yard equipment and other vehicles backing up.** Do not cut through container stacking rows. Follow all designated traffic flow patterns in the yard.
3. **All drivers/visitors in active loading/unloading areas MUST remain in their vehicle at all times,** unless directed by Young Brothers personnel for cargo handling purposes. Commercial truckers may leave their cab when locking/unlocking container castings, engaging/disengaging chassis, and other equipment handling processes.
4. **All commercial truck drivers (“truckers”) MUST wear a high visibility shirt or safety vest** in good condition (not faded or otherwise lacking high visibility).
5. **Shippers/truckers are responsible for marking all full container loads clearly with its accurate weight in pounds (lbs).** For the sake of consistency and clarity, do not use tonnage, and remove all prior weight markings that may be on the container.

The speed limit at all Young Brothers port facilities is **10 mph**, unless posted otherwise, and drivers must **come to a complete stop** at all intersections.

Please be sure to notify any and all drivers who require continued access to Young Brothers facilities of these important safety rules. Failure to follow these rules will result in loss of facility access privileges. Should you have any questions or concerns, please call your local Young Brothers office.

Sincerely,

/s/ Matthew J. Humphrey
